

DIGITAL CORPS FLOW CHART

STEP 1

Update Shared Spreadsheet

Update the [shared spreadsheet](#) and type your name in to the job you are assigned to (or would like to sign up for). Make sure the spreadsheet is updated by following steps 1-15 on [this tutorial](#).

Create Digital Corps Job Checklist

Create a checklist to be filled out at the strategic planning session using steps [15-25 of the tutorial](#) where you will also create a working Project Files folder.

STEP 2

STEP 3

Set up Strategic Planning Session

Update [the latest meeting agenda](#) with your new job status, then set up a strategic planning session with the client. Try to have the primary decision maker present to achieve a common understanding of goals. Bring a laptop with your checklist and fill it with steps on how you will achieve success.

STEP 4

Complete Drafts and Communicate

Complete your ideation and save your work to the [Project Files folder](#) you made. Communicate your ideas visually to the client. Once approved, send *only the chosen ideations* to Digital Corps Leadership for approval.

STEP 5

Upload Finished Work

Deliver the finished work to the client, confirm in email that the job is done, and then collect your finished work (in editable form) and upload [to the Finished Work folder](#). Upload a *jpg mockup* for the website to the same folder. Finally, update the shared spreadsheet in Step 1 to indicate that the job is complete.
