

File Organization Guide

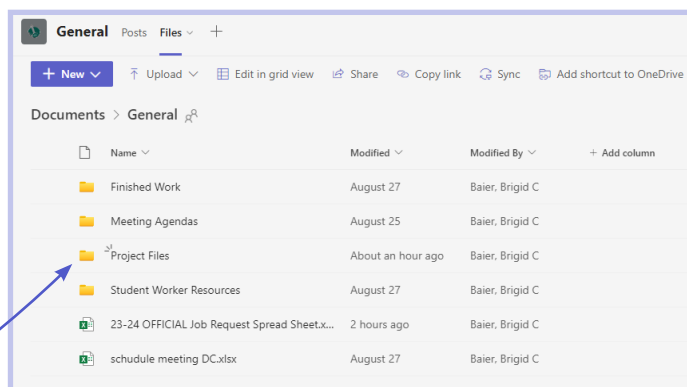

Digital Corps uses Microsoft Teams to organize its files and ideas. There are a lot of resources available to students through Digital Corps that can be found in our Teams Channel. Let's break it down so finding what you need will be easy.

MAIN PAGE

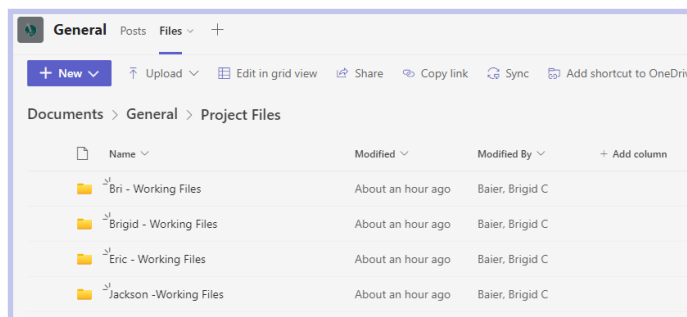

When you first open up the Digital Corps Team Channel, you will be led to the current year's content that is in a folder labeled "General." Everything here is being created and updated from the current year. You will be uploading your work into one of these main folders.

Each school year will be packaged up at the end of the year and a new folder will be created.*

YOUR WORK

On the main page under "Project Files," you will have your own folder for projects that are in progress.** While you are working on an assigned project, you should be uploading versions into "Your name - Working Files." As you begin taking on projects, you will need to have working files and be updating them in a folder for that project.

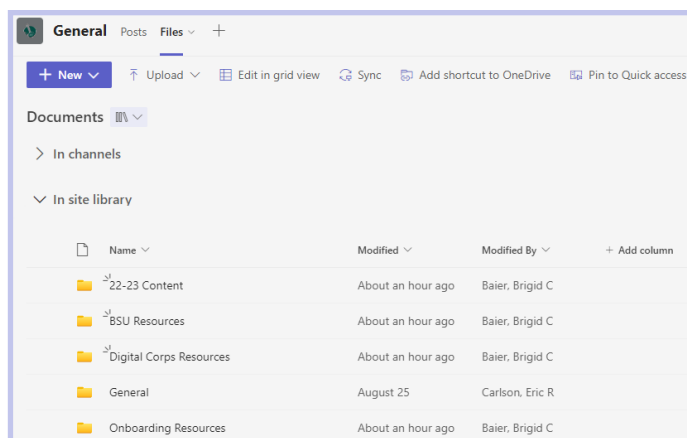

PREVIOUS YEARS CONTENT

At the end of each school year, the content from the "General" folder will be packaged up and labeled with that school year name. It will include the job request form, student working files, finished content, and the meeting agendas of that year.

Each year will be accessible under the "Documents" tab in the Digital Corps Team channel.

A new folder will be created for the up-coming year at the beginning of the summer and will be used going into the new school year.

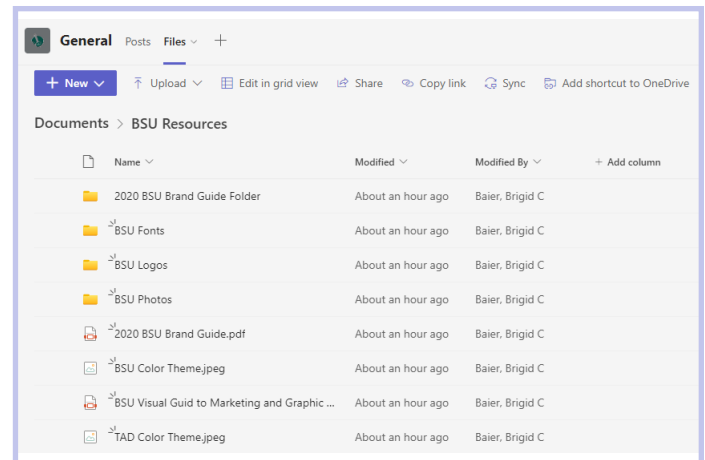

File Organization Guide

BSU RESOURCES

Under “Documents,” there is a folder labeled “BSU Resources.” This contains content and information for BSUs branding to keep our work cohesive with the universities.

There is a BSU brand guidebook for you to reference for typography, imagery, and logo use. All the BSU official fonts are available to download from OTF files under “BSU Fonts,” and a variety of vector images of the BSU and TAD logos are under “BSU Logos.”

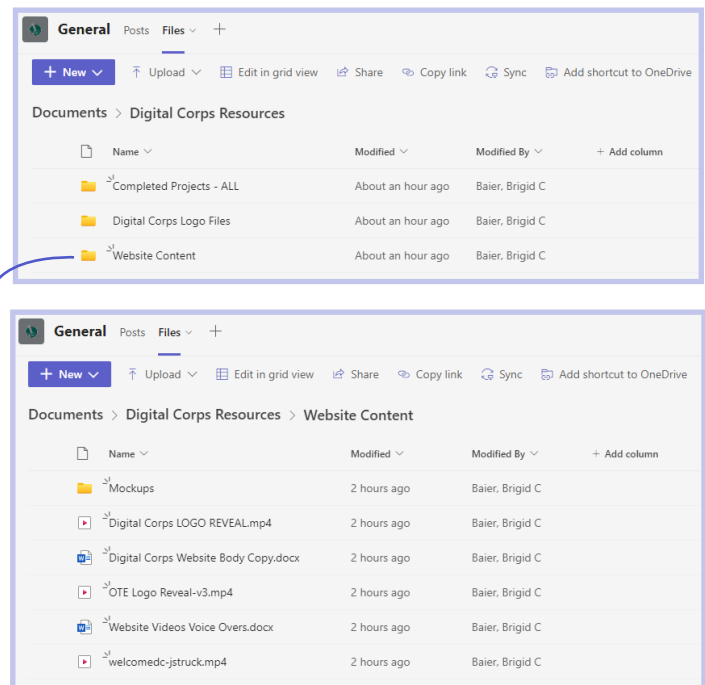

DIGITAL CORPS RECOURCES

Just like BSU, Digital Corps strives to have a cohesive brand identity. Under “Documents,” there is a folder labeled “Digital Corps Resources.” This includes logo files, the brand typeface, website content, and all of the projects completed through Digital Corps.

WEBSITE CONTENT

“Website Content” should be updated as the Digital Corps page on BSUs websites changes. This includes mock ups, videos, and the written content in a Word document. Keeping all of this content in one spot allows us to keep it up to date and to keep versions of our published work.

ON BOARDING RESOURCES

In order to help new student workers get comfortable working with Digital Corps, there will be a variety of resources available to them. Guides, like this one, will be added over time for students to reference.

Digital Corps not only serves the community through its projects, but it serves students as a resource. Getting comfortable working with clients, and learning how to operate beyond design with the help of faculty and peers will serve students in the long run when they are moving into their career.

* See “Previous Years Content” section on page 1.

** Refranchise “Setting up a Project” guide under “Onboarding Resources” folder.
